Irradiation mucositis and oral flora
reduction of mucositis by selective elimination of oral flora

I

Gram-negative bacilli are causative in the development of irradiation mucositis.

II

Chlorhexidine mouth rinses are obsolete in oropharyngeal decontamination procedures.

III

Special combinations of circumstances of a fortuitous nature are necessary before colonization, invasion and carrierstate of foreign micro-organisms can occur.

A.L. Bloomfield in Amer Rev Tuberc 1922;5:903-914.

IV

Oral Gram-negative bacillary carriage is not only a symptom of underlying disease but it also constitutes a genuine illness on its own.

V

No relation exists between oral yeast colonization and any of the mucositis signs.

VI

Surveillance cultures of the oral flora are indispensable in a proper patientcare during head and neck irradiation therapy.

VII

De toestemming voor het dragen van het kunstgebit tijdens hoofd-halsbestraling is een kunstfout en leidt tot kunstmatige voeding.

VIII

Objective scoring methods in medicine are always subjective.

IX

Antibiotica dienen eigenlijk uitsluitend als prophylaxe te worden voorgeschreven.

X

The conclusion that the substantial toxicity of radiotherapy delivered to the oral cavity constitutes an intrinsic property of these tissues, is not justified.

XI

De klassificatie van fibro-osseuze-cementeuze dysplasie van de kaken is eenvoudig.

XII

De methode 'twee vliegen in een klap' is van toepassing op de hoofdoverwegingen in het 'Structuur-rapport kaakchirurgie tot het jaar 2000'. Het ongedaan maken van de reductie van medische basis- en klinische vakken in het curriculum van de studie tandheelkunde is in vele opzichten effectiever en zinvoller dan de toelatingseis van de 'dubbele kwalificatie'.

XIII

Het recht der volksvertegenwoordiging van de parlementaire enquête moet de verantwoordelijke bewindslieden inzake de M-fregatten der Koninklijke Marine doen besluiten open kaart te spelen; een dergelijke enquête lijkt anders onafwendbaar.

XIV

De hoogte van de kortingspercentages op de prijzen van kinderspeelgoed suggereert op zijn minst een winst die ontoelaatbaar is.

Groningen, 8 februari 1989

F.K.L. Spijkervet
